PROFESSIONAL SUMMARY

Proactive IT Support Specialist with a passion for troubleshooting and systems optimization. I excel at diagnosing hardware malfunctions, resolving software glitches, and managing network security protocols. With a strong background in helpdesk ticketing systems and remote support tools, I focus on providing rapid, 'first-fix' resolutions. Committed to continuous learning, I am currently expanding my expertise in cybersecurity and virtualization to better protect and support modern business operations.

SKILLS

- **System & IT Support:** Hardware and software troubleshooting, system installations, and infrastructure maintenance.
- **Security & Maintenance:** Antivirus/malware scanning and removal, patch management, system updates, backup and recovery basics
- **Tools & Technologies:** Task Manager, TeamViewer, Event Viewer, Command Prompt, PowerShell (basic), Remote Desktop, ticketing systems. Virtualization (VirtualBox / VMware) for testing and troubleshooting
- **Productivity Tools:** Advanced Microsoft Excel, Google Workspace, and technical project reporting.
- **Interpersonal:** Technical problem-solving, customer experience management, and cross-functional team collaboration.
- **Networking:**
Fundamental networking concepts including LAN/WAN, TCP/IP, DNS, DHCP; Wi-Fi and Ethernet troubleshooting; network connectivity testing using ping, tracert, and ipconfig.
- **System Monitoring & Troubleshooting:**
Monitoring system performance, identifying errors, and resolving issues using Task Manager, Event Viewer, and command-line tools.
- **Remote Support:**
Providing remote technical assistance using Remote Desktop and basic remote support tools.
- **Virtualization & Lab Environments:**
Creating and managing virtual machines for testing and learning using VirtualBox / VMware.

PROFESSIONAL EXPERIENCE
